

**2025 Breeding Season**  
Equine Reproduction and Breeding Service

## **Equine Reproduction & Breeding Service (All fees inclusive of GST)**

### **Mare Reproduction Services – Thoroughbred**

#### **1. Season Contract Fees - Mare Breeding Management**

Thoroughbred Season contract fee ..... \$1,175.00

#### **Covered**

- Fees include ultrasound scanning, pre breeding swabs, pregnancy test, oxytocin (peri ovulatory), prostaglandin, ovulation induction drugs, and one post-breeding treatment (flush +/- uterine infusion), twin reduction, Caslick, 45day preg cert
- Fees are for breeding on farm (travel included)
- Fees allow for up to 6 week days scanning per week as deemed necessary by the attending veterinarian.
- All rectal scans up to 45 days
- Post foaling lavage (if required)

Contracts will be billed when the mare is first presented to the crush for a reproductive scan.

#### **Not Covered**

- Contracts do not cover foalings.
- Contracts do not cover removal of retained foetal membranes
- Contracts do not cover any foal care, medications or examinations
- Contracts do not cover specialised intra-uterine treatments (e.g. acetylcystine)
- Placental scans (post 45 days)
- Mare vaccinations
- Domperidone
- Progesterone/Altrenogest
- Anti-inflammatory medications
- Sedation
- Uterine biopsy and or cultures other than routine pre breeding swabs
- Settle, Receptal, Fertagyl, Cu Mate devices ,ovuplant
- Blood sampling

Please note: Sedation/rectal relaxants are NOT included in the contract fees. Mares may need to be sedated from time to time. This is for the safety of the attending veterinarian and the mare.

## **Mare Reproduction Services Contract Thoroughbred Season Fee (\$1,175.00 incl GST)**

Mare Owner Name: \_\_\_\_\_

Address: \_\_\_\_\_

Suburb: \_\_\_\_\_ State: \_\_\_\_\_ Telephone: \_\_\_\_\_

Email: \_\_\_\_\_ @ \_\_\_\_\_

Mare/s (or complete attached Schedule): \_\_\_\_\_  
\_\_\_\_\_

This contract entered into on the date of acceptance, by and between the aforementioned mare "Owner" and Victorian Equine Group who mutually agrees to the following:

### **Agreement**

1. The Owner agrees to breed the mare/s listed above during the 2025 breeding season.
2. The Owner agrees to pay a set fee of as per the above amount for the breeding contract.
3. Mare contracts are billed to the owner as soon as the mare is presented to the crush for scanning. This payment, in full, is due according to agreed payment/trading terms with Victorian Equine Group. If payment is not received with 7 days of payment/trading terms all further reproductive work will stop on the mare, regardless of stage of cycle, until payment in full is received.
4. The Owner agrees that the fee includes standard medication and testing only.
5. The inclusions/exclusions of this contract are listed above. Inclusion/exclusion vary between farms.
6. Transfer of this contract to a Pay-Per Service Fee may be granted at the discretion of the Victorian Equine Group Partners in extenuating circumstances.
7. The contract allows for three full cycles, additional cycles will be charged on a per service basis.

**Note:** Approximately 10% of pregnancies result in twins and that these are routinely managed by early identification to a single pregnancy. This procedure is usually successful but occasionally can result in the loss of both embryos. Follicle and pregnancy testing involves per-rectal examinations of mares, and these procedures are important in the reproductive management of mares but they carry a small risk of (Rectal Tears) inadvertent serious injury including death to the mare.

The Mare Owner's signature on this contract attests to the fact that the Mare Owner has read and understood all of the terms outlined herein and accepts this agreement.
